

CONFERENCE ANNOUNCEMENT:
 Norms, Reasoning and Knowledge in Technology
 Norms in Knowledge NWO Project
 Section of Philosophy and Ethics of Technology
 Technical University of Eindhoven

June 3–4, 2005

The Philosophy Dept. of the Technical University of Eindhoven is hosting a workshop titled “Norms, Reasoning and Knowledge in Technology,” in Boxmeer, the Netherlands.

The two-day event features presentations on topics in philosophy of technology, practical reasoning and normative theory. We have brought together speakers from diverse backgrounds to stimulate new discussions on issues of philosophy of technology and means-end reasoning.

We invite a similarly diverse audience to participate in the conference. Each talk will be followed by a reaction by a designated respondent and open discussion. Please indicate if you would like to be considered for a designated respondent slot and, if so, your background and interests.

For more information, email NiK-conf@tue.nl or visit our website. Registration information may be found at the site.
